LET'S GET SOME FACTS STRAIGHT

Due to a natural chemical balance, grapes ferment without the addition of sugars, acids, enzymes, water, or other nutrients.

Wine tastings' are somewhat inaccurately named. Top sommeliers agree that smell is by far the most important sense when it comes to drinking wine.

A "cork-tease" is someone who constantly talks about the wine he or she will open but never does.

One grape vine produces 10 bottles.

European wines are named after their geographic locations while non-European wines are named after different grape varieties.

Chilling tones down the sweetness of wine. If a red wine becomes too warm, it may lose some of its fruity flavor.

Wine is made with grapes, but it is NOT made with the typical table grapes you would find at the grocery store.

One glass of wine consists of juice from one cluster(Seventy-five grapes).

Let's get some more facts straight!

SING FOR YOUR SPIRITS

Having a sing in the shower starts your day off in the right way, but what do you think about singing to your drinks (okay, it happens sometimes when you've had a few too many...). Well, Hudson Bourbon play dubstep to their barrels, and Mozart Dark Chocolate Liqueur play Mozart to their casks!

THE THREE SIP RULE

Did you know that in Texas, USA, there is a state law that prohibits you from having more than three sips of beer whilst standing?! Okay, I guess we'll just have to sit down and enjoy our drinks then...

THIS IS NOT REFRESHING!

Want to advertise your new cocktail or spirit? Well, you won't be calling it refreshing! This word is banned when talking about anything alcoholic.

STORIES OF SQUARES

Ever wondered why Jack Daniels is in a square bottle? There's actually a really practical idea behind it. As well as being original and standing out from other bourbon bottles, the square bottles don't roll about and smash when being transported, and they've been that way since 1895.

THESE COCKTAIL FACTS ARE POPPING

There are an estimated 49,000,000 bubbles in every bottle of champagne! Each bottle has three times more pressure than a car tire, so watch your eyes when your popping those bottles!

PINEAPPLES IN PUERTO RICO

Did you know Puerto Rico's national drink? If you like getting caught in the rain, you'll love this one! It's the Pina Colada!
