## CAP CLASSIQUE & SPARKLING WINES

In South Africa Methode Cap Classique is a classic method of making champagne by creating a second fermentation in the bottle. The term Cap Classique has been used in South Africa since 1992. The most common wines to be used for this method are the Sauvignon Blanc and the Chenin Blanc, but it is also possible to use Chardonnay. For a darker, more original sparkling wine, Pinot Noir can be added to the Methode.

## SAUVIGNON BLANC

Sauvignon Blanc is one of the most familiar of the Southern Hemisphere's white wines, and along with Chenin Blanc and Chardonnay, is also one of the most planted grape vines in South Africa. The country has no real claim to rival New Zealand as the biggest grower of Sauvignon Blanc in the tri-nation countries, but South Africa is still a big producer of the wine, both as a single varietal and as a blender along with other wines such as Chardonnay and Chenin Blanc. Despite New Zealand's claim to be the best maker of this wine, some modern wine experts believe that South Africa has the potential to overtake the former country.

South Africa produces a wide variety of white wines, taken from traditional white grapes such as Cabernet Sauvignon and Pinot Noir, as well as varieties which have been produced in South Africa itself. One of the newer varieties of

South African white wines, established during the 1980s and 90s, is Chardonnay. This ever-popular wine is one of the most widely drunk around the world, but it is only in the last two decades that it has begun to gain ground in South Africa. Nevertheless, it is one of South Africa's best exports, and has a distinctive flavour that can be enjoyed with a variety of meals.
