E&OE, all wines subject to availability.

We hold a large number of wines on site, more than 700 bottles at any one time. To preserve the quality, all our wines are stored in a darkened cellar where the temperature is cool and stable.

Serving temperature for white wines is preferably around 7 deg, and will therefore require cooling in an ice bucket for a few minutes before serving.

Our house wines are stored in wine coolers: white wine 7 deg, red wine 13 deg.
