

Jerry's was borne from my belief that a burger isn't JUST a burger!
We aim to provide an experience, using the freshest, best locally-sourced ingredients on a daily basis.

**"If a design is good enough, it will find its own buyer.
We don't have to sell it."**

Norman 'Sailor Jerry' Collins, June 28 1971

In the 1920's tattooing was an expression that belonged to an emerging American counter culture. It was a mark of not blindly following the mainstream.

Jerry's pays homage to the godfather of Western tattoos, 'Sailor Jerry.' Born Norman Collins in 1911, he was nicknamed 'Jerry' by his Dad, after their belligerent family mule! ('Sailor' came later, after he joined the Navy).

He left home as a teenager and started learning his craft, using only a needle and black ink at first. He joined the Navy and then settled in Honolulu. After the bombing of Pearl Harbour - with 12 million Americans in the Military spending time in Honolulu on their shore leave - this is where he built his legacy.

He pioneered colour tattoos by developing his own pigments and created needles that embedded the pigment with much less trauma to the skin. He also led the way with single-use needles and sterilising equipment. He was a self-taught electrician which helped him innovate his tattoo machines.

In 1972 he invited future tattoo legends Mike Malone and Ed Hardy to apprentice with him and asked upon his death for them to take over his shop. He was riding his Harley in 1973 when he had his fatal heart attack, but his legacy lives on . . .

SHARK TATTOOS

Sailor Jerry's attitude toward sharks embodied those of many a sailor. You want to hate 'em, but you gotta love 'em. Sometimes animal tattoos are about taking on its traits. A lion for bravery, panther for being tough. But a shark is about what you overcome, that you're willing to stand your ground and not about to become seafood!

PANTHER TATTOOS

Panthers are usually inked as totems of prowess and virility, sometimes also symbolizing a connectedness to nature.

Sailor Jerry's panther tattoos are particularly ferocious and masculine – drawn with red, often bloody claws, open jaws and occasionally in the company of a nude woman (who, for some reason, Jerry always made a redhead).

PIN-UP GIRL TATTOOS

Pin-up girls represented the ideal and extremes of femininity — from maidenly perfection to vixen-ish temptation. The woman inked on a sailor's arm would be the only feminine form he would see for months. Applying his bold, refined style to the pin-up, Sailor Jerry created what could be argued as the world's most iconic pin-up tattoos.

PIG AND ROOSTER TATTOOS

The superstition behind this tattoo has to do with the wooden cages where roosters and pigs were kept in on ships. When ships wrecked, the lightweight wooden frames became personal flotation devices, giving them a surprising survival rate. A sailor hoping for good luck would get a rooster tattoo on top of the right foot and a pig tattoo on top of the left.
