ITALIAN PIZZA THE SOUTH AFRICAN WAY!

Family Take Away & Deli

Even though pizza is originally of Italian origin, it is a delicacy in most countries around the world, and each country has perfected their recipe for the perfect pizza. In South Africa we are no different. Seeing that we are a population that enjoys eating meat more than some other countries, it's no surprise that our perfect pizza would also include more meat in its topping. Well wherever you come from and what ever your toppings of choice are, at The Barrel we cater for your individual need.

So either choose a pizza from our wide variety of pizzas or feel free to design your own pizza from our range of toppings available. Should our inventory fall short of something you would have enjoyed on your pizza or should you have a combination that you think will be a winner in our store, please feel free to chat to us. Your satisfaction is what we are here for!
